Tuesday 30th June – Parents evening Richmond and Kew

Thursday 2nd June – Parents evening Syon and Sixth Form

To Provide exceptional learning experiences, where staff empower students and their families to be thriving members of their community

Head Teacher News

Dear Parents and Carers,

I hope you all had a lovely break over the holidays, and that those of you who were celebrating enjoyed a wonderful Easter. I have been enormously proud of how well the students have settled back into school routines after the two-week break.

It is hard to believe that we are now beginning the final term of the year. The summer term is always a busy one, filled with exciting activities for students, as well as preparations for our leavers as they move on to their next destinations.

Next week, preparations will begin for the school show—always a highlight of the year! More details will follow soon.

Please see dates above from Muna about upcoming parent events – She will be sending further information.

Wishing you all a fantastic weekend.

Kind regards,
Mairead

Richmond 1

Richmond 1 have been taking part in a range of physical activities to support their development and wellbeing. All students have enjoyed sessions such as bowling, basketball, and swimming, where they have been encouraged to explore movement, coordination, and participation. Well done, Richmond 1!

Crane 1

At the end of last term Crane 1 started a Breakfast Club in our Food tech lessons. We have been learning to make our own breakfast including toast, tea, coffee, porridge and (this week) pancakes! We also made some fresh orange juice with oranges given to us by Ethan's dad – Thanks Aaron!

Syon 6

Syon 6 students had a busy yet enjoyable last term. We had another visit to Sky Studios, where we gained hands-on work experience in making and editing videos. A dental hygienist also visited us and helped us learn how to brush our teeth properly using a giant model mouth, which was great fun. During Science Week, we carried out an exciting experiment each day, making it a highlight of the term.

Kew 6

It has been lovely to see all students back after the Easter break. They have returned to school enthusiastic and ready to learn.

This term in Food Technology, students are working hard to develop their ability to cook healthy meals independently by following a recipe book. They are also learning how to create shopping lists and use their maths skills to compare prices, helping them decide which items cost more or less.
